# Doing business in Moldova

Moldova

Moldova

*On behalf of the Government of the Republic of Moldova I would like to introduce our country as an exceptional location for investments and to invite you to acquaint yourself with the plenty of opportunities it can offer to foreign business community.*

*Moldova is a developing country close to functional market economy, situated at the crossroads of West and Eastern Europe. Nowadays the country's combination of highly skilled labour force, along with availability of a low-cost manufacturing environment, makes Moldova very attractive for the development and expansion of entrepreneurial activities.*

*We are offering a range of investment facilities to foreign investors; Moldova is already a member of the WTO, of the Central European Initiative, of the Stability Pact for South-Eastern Europe and the Organization of the Black Sea Economic Cooperation. It has concluded Free Trade Agreements with all countries – members of the Stability Pact for SEE, the CIS countries and it beneficiaries from the ATP granted by the European Union. Starting with 1st of January 2007, the Republic of Moldova is a close neighbor to European Union, having a direct access to a huge market.*

*I will have the greatest pleasure if you accept our invitation to visit Moldova and find out more about business and investment opportunities offered by the country as with its unique culture, which I am sure you will enjoy.*

**Yours sincerely,  
Igor DODON  
First Deputy Prime Minister  
Minister of Economy and Trade  
of the Republic of Moldova**

## Republic of Moldova General outline

The Republic of Moldova is a small country, favorably located in south-eastern Europe, which covers the area of 34.000 square kilometers. Being situated at a distance of 300 km from Black Sea, Moldova extends over 350 km from North to the South and 150 km from West to the East. The country has an access to the Black Sea through the Danube River and Giurgiulesti Port, which is the southerly point of the Republic of Moldova. Moldova borders two countries: Ukraine on the East and Romania on the West. Due to Romania's and Bulgarian's adherence to European Union in 2007, Moldova became a close neighbor to EU.

Country's favorable geopolitical location at the cross-roads of economic and commercial links, which connect European Union with the CIS countries, offers unique possibilities for developing any kind of business activity. Benefiting from developed network of transportation and communication links, Moldova has important opportunities for co-operation with the countries of the region.

Population of Moldova accounts about 4.2 million inhabitants that represent several ethnic groups. Among them there are about 64% Moldovans, 14% Ukrainians, 13% Russians and other ethnic groups. Due to presence of several ethnic groups, Moldova is a country with several spoken languages. Official language of the country is called Moldovan and another widely spoken language in Moldova is Russian. Almost half of population lives in urban area.

Because of close location to the sea, Moldova has a temperate continental climate. Summers are warm and winters are mild. Big temperature fluctuations are rare and precipitations occur all the year long.

Chisinau, the capital of the Republic of Moldova, located in the central part of the country, with more than 700.000 inhabitants, is a significant administrative, political, economic, scientific, cultural and tourist centre. Situated in a pictorial environment, on seven hills, Chisinau impresses local citizens and its visitors. The capital of Moldova is considered to be one of the greenest cities in Europe. There are many parks in the city, as well as special green zones. The city is divided into 5 sectors: Centru that is the oldest part of the city, Riscani, Botanica, Ciocana and Buiucani. For the first time Chisinau city was mentioned in historical documents on 17 July 1436, so it can be considered an old one. There are many places for tourists to see in Chisinau (monuments, museums, parks). Other large cities in the Republic of Moldova are Balti, Cahul, Tiraspol, Tighina.

## Visa requirements for foreign citizens

## Moldovan Investment and Export Promotion Organisation

In order to identify and establish reliable cooperation relationships between your company and Moldovan entrepreneurs, foreign investors are welcome to address to Moldovan Investment and Export Promotion Organization (MIEPO) – your gateway to our country. MIEPO is a government institution with the primary aim to promote investments and exports in the Republic of Moldova and with the objectives and structures based on the most successful models in the world. The organization is permanent focusing on assisting prospective investors to locate and expand in Moldova, by providing a range of free-of-charge information and services.

MIEPO is assisting foreign companies by presenting the Moldovan investment opportunities and helping them to develop and expand business in Moldova. The organization is offering post-investment services, in order to enable optimal business outcomes and to make new cooperation and partnerships possible.

MIEPO is conducting promotional activities and campaigns aimed to promote Moldova as an attractive location for foreign investments: inward and outward investment missions, investment forums, etc.

In cooperation with ministries we are actively involved in creation of more favourable business and investment environments, including improvement of legal framework for foreign investments and removal of administrative impediments.

MIEPO provides help and assistance to local compa-

panies in establishing of goals, preparing product promotion programs and export strategies that will help enterprises to expand sales abroad. At the same time our experts are working closely to identify barriers that prevent companies' achievements and prepare proposals how to overcome them, submitting them to Government.

Outward business missions are organized to facilitate the easier access of Moldovan products on foreign markets; inward buyer missions and site visits – to establish a closer contact between local and foreign companies. This offers to local producers the possibility to show the full range of products, their production and technological capacities, etc. MIEPO facilitates also sector and product promotion programs.

Trade fairs and exhibitions are reviewed in a database, which helps local companies to be well informed about the possibilities to promote their products both on local and foreign markets. Our team advice local companies attending International fairs and trade exhibitions, Investment Forums, specific Investment and Export promotion seminars, round tables and workshops that are organized in Moldova as well as abroad.

Other MIEPO activities:

- works directly with enterprises, local authorities, Government agencies and international organizations to identify issues which impede trade and investment development.
- cooperates with Investment Promotion Agencies, Trade Promotion Organisations, Chambers of Commerce and other international trade organizations, for the benefit of Moldovan economy.
- Performs analysis and assessment of local and foreign trade procedures and investment policies and regulations. Submit to the Government practical proposals for improving business and investment climate of Moldova.

## Regional opportunities for business development

**Free Economic Zones (FEZ)** are parts of the customs territory of Moldova, separated economically, and strictly bounded on the entire area, where certain types of entrepreneurial activities are allowed on preferential conditions to local and foreign investors. There are six Free Economic Zones (FEZs) in Moldova at present: Expo-Business-Chisinau (located in the capital Chisinau), Ungheni-Business (107 km northwest of Chisinau), Tvardita (115 km south of Chisinau), Otaci-Business (220 km north of Chisinau), Valkanes (in Vulcanesti, 200 km southwest of Chisinau) and Taraclia (153 km south of Chisinau).

In 2008 total investments in afore-mentioned FEZs amounted up to 118 mil. USD. The largest share of it has been invested in Expo-Business-Chisinau Zone (40 %). The investment in Ungheni-Business FEZ over the last six years of operation amounted to 34.2 mil. USD. The total number of companies registered in the FEZs till the end of 2008 was 147, of which 38.7% were located in "Expo-Business-Chisinau".

Two industrial zones for business development were created within the Giurgiulesti International Free Port (GIFP) and the Free International Airport „Marculesti” (FIAM). GIFP operates according to the provisions of the Law nr. 8-XV from 17 February, 2005. It consists of a petroleum terminal, a cargo port and a passenger terminal. Due to its location on the Lower Danube with available water depths of up to 7m, GIFP is capable of receiving both inland and sea-going vessels. FIAM was created on 10 July, 2008 (under the Law nr. 178-XVI) and aims at accelerating the development of air transportation, air services, industrial production (export and foreign trade-related activities).

All Moldovan Free Economic Zones provide preferential conditions to local and foreign investors that can invest in different types of entrepreneurial activities. The range of industrial goods produced in the FEZs has diversified significantly during the last few years.

Investors in Moldovan FEZs are guaranteed against, and protected from changes in legislation for a period of up to 10 years, and the legislation provides further incentives, guarantees and privileges for Free Economic Zone investors. FEZ residents enjoy a special customs and tax regime. In particular, they benefit from the

following advantages:

- Exemption from customs duties on goods imported into the FEZ and subsequently exported;
- Exemption from excise duties for goods imported into the FEZ and subsequently exported;
- Exemption on taxable income obtained from agricultural production within the FEZ.

The Industrial Parks were established in the Republic of Moldova according to the Law on Industrial Parks N. 164-XVI from July 13, 2007. It is expected that these parks will attract significant investments in the near future and will host various industrial projects.

By law Industrial Parks may be created either on the territory of state enterprises or through Greenfield investments. The industrial parks are developed for a period of no less than 15 years and no more than 50 years:

- the infrastructure is ensured by government;
- Investors pay only 30% of the normative rent cost;
- Investors can buy areas after park's operational period

At present, only placements for industrial parks have been identified. The following industrial parks will be opened: the industrial park in Floresti (60 ha, situated close to the border with Ukraine), the industrial park in Ungheni (50 ha, situated on the border with Romania) and the industrial park in Cainari (23 ha).

Giurgiulesti International Free Port (GIFP), Moldova's only port accessible to sea-going vessels, is situated at km 133.8 (nautical mile 72.2) of the River Danube in the South of Moldova, sandwiched between Romania (and therefore the European Union) and Ukraine.

GIFP benefits from its location on international trade and transportation routes such as the Rhine-

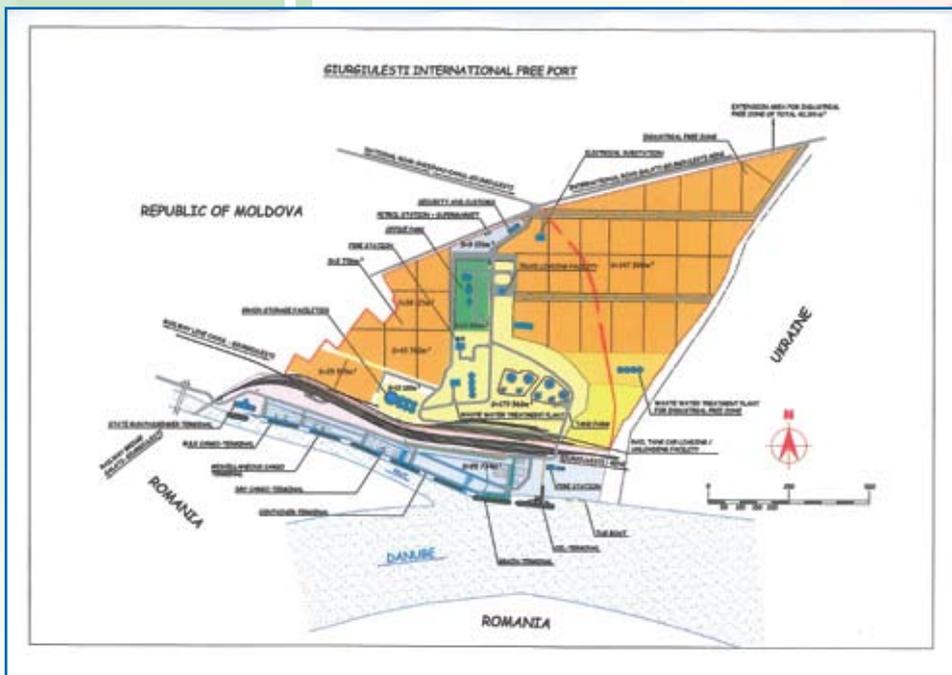

Port Facilities

Main-Danube waterway corridor which connects the Black Sea, 14 European countries and the North Sea; the European standard and Russian railway systems as well as the international road network. Against this background, GIFP serves its clients as a regional logistics hub in the midst of the rapidly growing economies of South Eastern Europe.

Danube Logistics SRL, a Moldovan limited liability company, is the general investor, owner and operator of Giurgiulesti International Free Port. In December 2004 Danube Logistics signed with the Government of Moldova an investment agreement for the

construction of Giurgiulesti International Free Port. Danube Logistics' shareholders are the Dutch EASEUR Holding BV and the European Bank for Reconstruction and Development, holding 80% and 20% of Danube Logistics shares respectively. The company, which is managed by an international team of professionals, has offices in Giurgiulesti and in Chisinau, the capital of the Republic of Moldova.

Due to its location on the Maritime Danube with available water depths of 7m, GIFP is capable of receiving both inland and sea going vessels. Against this background GIFP serves its client as:

- The only direct sea/river-borne transshipment and distribution point to and from the Republic of Moldova,
- A regional logistics hub on the border of the EU with access to road, rail, river, sea, and
- An excellent location for business development, because of its strategic location, tri-modal transport infrastructure, low cost environment and a unique customs and tax regime.

# New incentives for business development

## INCOME TAX AT "0" %

Establishing the income tax at 0% means the exemption from tax if the income remains at the disposal of the undertaking and its application only in case when the income is distributed between the shareholders (associates).

### Scope

The implementation of the reform will determine the investors to reinvest the profit for the extension and development of the businesses, to invest the incomes of undertakings, including the amount of the income taxes that were not paid to the budget, in purchasing goods and services for which VAT is applicable, as well as give up on different schemes of evasion from income tax payment when importing goods or services.

### Legal base

The income tax at 0% is implemented by the art.1 of the law No.111, which foresees the amendment of the Tax Code and of the law on the application of the 1st and 2nd titles of the Tax Code.

### Subjects

Subjects of taxation are the physical and legal persons that during the fiscal period obtain income from any sources whatsoever in the Republic of Moldova, as well as the legal persons that obtain income from any sources outside the Republic of Moldova and the physical persons that obtain investment or financial income from sources outside the Republic of Moldova.

### Area of application

The taxable income represents the gross income, including the facilities provided by the employer, obtained by the taxpayer from all the sources in a specific fiscal period, with the exemption of the deductions and exemptions, related to this income, to which the taxpayer has rights according to the fiscal legislation.

The gross income includes:

- The income obtained from practicing the activity of entrepreneurship, from the professional activity or other similar activities,

- The income from the activity of the companies obtained by the associates and the income obtained by the shareholders of the investment funds,
- The payments for the jobs and services done (including salaries), facilities provided by the employer, honoraria, commissions, bonuses and other similar payments,
- Income from rent
- Capital increase,
- Capital increase over the loss of capital, not taken into account in other types of income,
- Income obtained as a form of profit,
- Royalty,
- Annuities, including those received as base for international treaties to which R. Moldova is a party, the amounts and compensations received from insurance and co-insurance contracts,
- Income resulted from non payment of debts by the undertaking, with the exception of cases when the debt is a result of the bankruptcy of the taxpayer,
- State subsidies, bonuses and awards that are not mentioned as non-taxable in the laws that regulate these payments,
- Amounts obtained as a result of the agreements (conventions) of non participation in competition,
- Dividends
- Income obtained, according to the legislation, as a result of application of the penalty clause, in the form of reparation for the income loss and as a result of retaining of advance payments or restitution of advanced money,
- Other income not specified above.

### Implications

As a result of establishing the income tax at 0%, the undertakings will be exempted from paying the income tax. Only the payments that have the form of dividends paid to physical persons will be taxed with 15% standard corporate tax. The advantage consists in the fact that the undertaking can direct the obtained income to the development of the company without minimising this specific amount with the tax rate.
