#### **ITD Hungary - A One-Stop Shop for Business**

The government's investment and trade development agency was established

in 1993 to promote inward investments and bilateral trade. With representative offices in eight regional centres of Hungary and a foreign network operating under Hungary's diplomatic services and by special assignments in 60 countries, ITD Hungary is a **single point of contact** to support decision-makers looking for new business opportunities in Hungary.

#### **Investment Promotion**

- In the decision-making process:
- Tailor-made, comprehensive information packages on the macro environment
- Information on R&D-specific issues
- Identification of possible research partners
- Organisation of partner meetings

During implementation:

- Advice on project partners and project financing
- Accelerated permitting procedures
- Assistance in applications for incentives

In the operational phase:

- Special follow-up services / After Care
- Advice and assistance to companies seeking to expand
- Advocacy to improve the business climate

#### **Trade Promotion**

Through a diverse set of marketing tools and support programmes ITD Hungary offers substantial logistical, financial and professional assistance to both start-up and established Hungarian exporters.

#### **Enterprise Europe Network**

ITD Hungary co-ordinates the Hungarian activities of the European Union's Enterprise Europe Network. The network offers support and advice to businesses across Europe and helps them make the most of the opportunities in the European Union.

#### Communication

ITD Hungary develops and distributes business literature, arranges business programmes for individual visitors and delegations, and organizes various business events. Its website is available in English, German, Italian and Hungarian.

Background

The foundations of the farm machinery and equipment industry were laid in 1848 by a simple blacksmith named János Lábassy, whose factory, unlike many other Hungarian-owned businesses, survived the economic crisis of 1870. The plant predominantly manufactured hand- or horse-drawn ploughs, but also produced household tools.

The other major Hungarian-founded agricultural machinery plant is inextricably linked to the name of Ede Kühne, who acquired the Pabst-Krauss factory in Moson in 1857. The company's illustrated brochure of 1865 already featured three-row sowing machines, a four-row drum seeder, various row seeders and a propriety spoon seeder system. Kühne Mezőgazdasági Gépgyár Zrt. continues to be one of the leading players on the Hungarian agricultural machinery market.

#### The present

There are currently 168 companies operating in the Hungarian farm machinery sector, 80% of which are small enterprises. Mid-sized companies make up 13% of the market, while manufacturers with turnover exceeding EUR 15 million represent 4%. The registered capital and capital stock of these companies is 40% in Hungarian hands and 60% in foreign ownership. The largest companies have a higher proportion of international stakeholders. As a result of ongoing development, the products offered by Hungarian-based manufacturers meet the latest standards almost without exception, although the majority of this equipment will not be familiar to most export markets.

In the period between 2000 and 2008, the Hungarian agricultural manufacturing sector showed impressive growth, even despite ongoing economic instability, with production increasing by an annual average of around 10%. The second half of this period showed outstanding performance with output increasing by 16% yearly over the four years.

This dramatic growth was driven by yearly 19% increases in exports, while the 6% annual expansion of the domestic market is nothing to be ashamed of. Exports currently account for around 66% to 70% of the market, a total of EUR 360 million, roughly equivalent to the volume of machinery sales in Hungary.

The high levels of innovation in Hungarian factories is seen primarily in machinery exported abroad and manufactured by Hungarian subsidiaries of international companies, but also in products designed and manufactured independently in Hungary.

#### Innovative, cost-effective solutions

In terms of performance, quality and efficiency, the various harvesting adapters manufactured in Hungary match those of major Western European manufacturers. In the market for spraying machines, we have also seen new solutions introduced for targeted dispersal of pesticides, as well as fully automated equipment. A number of fully variable Hungarian-made soil cultivation products are ideally suited to local needs and offer superior value for money. Machines for vegetable-growing and fertilisation have also been developed with local needs in mind.

The development of the Hungarian agricultural machinery industry is strongest in the up-and-coming field of bioenergy: manufacturers of state-of-the-art combustion furnaces, presses and shredders have been joined by a variety of developers of specialist products in the field. These include various biomass harvesters, as well as planting and cloning systems. It is also in this field that research and development of automated systems in harmony with the principles of plant breeding and agronomy has seen rapid progress. Hungarian developers were also involved in a successful project to design a grain dryer connected to a biomass firing system.

Key products and technologies include: **universal seeders** suitable for various tillage practices; **tilling machines**; custom-engineered **forestry machinery** developed for specialist tasks; **harvesting machines** with Hungarian-developed and manufactured maize and sunflower adapters; new **spraying solutions** for targetted dispersal of pesticides; **biomass collection** machines, planting and cloning systems; **animal husbandry** technologies, i.e. HungaroLact milking technology.

### Agrikon Solt Gépgyártó Zrt.

6320 Solt, Bartók Béla utca 2 Telephone: +36 78 486 016 E-mail: info@agrikonsolt.hu www.agrikonsolt.hu

#### Profile:

Hungarian-owned agricultural machinery producer with a 62-year pedigree.

Languages of communication: English, German

#### Main products and services:

• Organic manure spreader

- Interchangeable agricultural superstructures
- Tillage machines: Offset disc harrow, combinators, seed-bed forming machines, deep tillers, harrows, at-tachments
- Disc harrows and trailers for forestry applications

Main export markets: Slovakia

### Agro Legato Kft.

1134 Budapest, Lőportár utca 16 Telephone: +36 1 412 5084 E-mail: info.hu@agrolegato.com www.agrolegato.com

#### Profile:

Agro Legato Kft. is a Budapest-based and Hungarianowned company established in 1996. The factory offers a full range of carefully constructed, flexible and integrated solutions to the dairy industry. It is a leading supplier to the Romanian market and is active in Bulgaria and other emerging markets. The company is expanding into the livestock farming, dairy processing and food security and hygiene sectors.

#### Languages of communication

English, Bulgarian, Romanian

#### Main products and services

- Supply of HungaroLact milking technology, cooling technology, parts and components
- Supply of end-to-end farm technology for cows, and sheep and goats
- Animal-breeding performance analysis (approved milk metres, technological livestock weighing systems, etc.)
- Animal health, udder health, mastitis control
- Tools and devices for breeding, reproduction and embryo transfer
- Farm-level laboratory devices, tools and tests
- Quality assurance, food safety, food hygiene
- Professional advisory service, consultancy, case studies

#### export markets

Bulgaria, Romania, Slovakia, Slovenia, Serb Republic, Macedonia, Albania

#### The Hungarian agricultural machinery industry

### Agrogép Kft.

4461 Nyírtelek, Kastély utca 3 Telephone: +36 42 525 111 Email: agrogep@agrogep.hu www.agrogep.hu

#### Profile:

Agrogép and its legal predecessors have been involved in agricultural machine and vehicle manufacturing for the past 40 years. The company has decades of experience in the engineering and manufacturing of specialised vehicles for waste removal, as well as trailers and tankers. The company has grown into one of the most successful in the sector in Hungary.

Languages of communication English, German

#### Main products and services

- Injection and watering tankers
- Transhipping trailers
- Agricultural trailers and tankers
- Municipal machines

**Main export markets** Germany, Romania, Slovakia

### ALEX Alföldi Exportfővállalkozási Kft.

5000 Szolnok, Meder utca 38 Telephone: 36 56 423 500 E-mail: alexKft@t-online.hu www.alexKft.hu

#### Profile:

ALEX Kft. is a privately-owned small enterprise founded in 1991 in Szolnok. The company has gained a reputation in Hungary and in neighbouring regions as a manufacturer and distributor of materials transport equipment for grain storage. Our main scope of business is the manufacture of conveyor belts and bucket elevators.

As a small company with 20 employees, we are able to flexibly meet the diverse challenges of materials transport in the industry. In recent years, we have intensified our focuse on product development in order to keep up with global standards and maintain our existing customer base.

### Languages of communication

Hungarian, German, English, Romanian and Russian

#### Main products and services

- Mobile conveyor belts
- Portable hoppers
- Wagon loading equipment

Overhead conveyor belts loading belts for silo/granary ceilings motor-driven discharge trolleys reversing conveyor belts crossbelts Conveyor belts with lightweight aluminium frames

Main export markets Germany, Romania

# Bagodi Mezőgép Kft.

8992 Bagod, Gépállomás utca 9 Telephone: +36 92 460 002 E-mail: bagodimezogep@t-online.hu www.bagodimezogep.hu

#### Profile:

Bagodi Mezőgép specialises in development and manufacturing machines for farming, forestry, fruit-growing and viticulture. Our products are suitable for preparing soil for agricultural, forestry and gardening purposes, as well as the planting and cultivation of plants in small and mid-sized farms.

Languages of communication English, German

### Main products and services

Forestry equipment

- Planting and forest management machinery for the purpose of energy forest cultivation
- Nursery and garden machines for soil preparation, sowing, care and harvesting
- Soil preparation, targeted sowing and planting (cutted or rooted) machines
- Soil preparation machines are suitable also for a complete soil preparation or to implement the tasks of the striped soil preparation.
- Planting machines for the establishment of new plantations, re-planting of cleared forests and planting stock.

#### Main export markets

Slovakia, Romania, Austria

### DGA Kft.

8460 Devecser, Vasút utca 35 Telephone: +36 88 513 342 E-mail: dga@dga.hu www.dga.hu

#### Profile:

DGA Kft. is a machinery factory with 50 years of tradition specialising in welded constructions, big-bag applications, automation and food industry machines. Development of agricultural machines is one of several new fields of activity.

### Debreceni Mechanikai Művek Kft.

4030 Debrecen, Híd utca 4-6 Telephone +36 52 526 460 E-mail: info@dmm.hu www.dmm.hu

#### Profile:

Debreceni Mechanikai Művek Kft. was founded in 1996. The company's predecessor began production of agricultural machines and parts in the 1950s. Its production processes have been continuously improved in line with the development of agricultural and manufacturing technology. The scope of this production ranges from simple, low-end machines to high-end, technologically sophisticated equipment for various applications in agriculture, harvesting and pest control. DMM recently expanded into other fields of industry. Since 1996, the company has also manufactured handbrakes for trucks and aluminium components for high-voltage electrical equipment.

### Ferro-Flex Kft.

8693 Lengyeltóti, Rákóczi utca 30 Telephone: +36 85 330 022 E-mail: laszlo.benke@ferroflex.hu www.ferroflex.hu

#### Profile:

Ferro-Flex Kft., based in the town of Lengyeltoti (population 4,000) around 15 km from Lake Balaton, specialises in the production of agricultural equipment and welded steel assemblies. Until late 1990, Ferro-Flex Kft. was a single manufacturing unit of Kaposgép (a state-owned company located in Kaposvár). It became a private company in 1991 and has been owned by Managing Director Csaba Horváth since 1993.

The company is run by a small team of highly skilled and dedicated professionals. Their goal is to maintain the highest standards of production and sales. Ferro-Flex products are durable, reliable and suitable for any task. Building on Ferro-flex's reputation for quality craftsmanship, we hope to expand our export markets and partnerships throughout Europe and beyond.

Languages of communication English, French, German

Main products and services Manufacturing and distribution of front loaders and implements

# Fliegl-Abda Gépgyártó Kft.

9151 Abda, Pilliengerpuszta Telephone: +36 96 553 303 E-mail: sales@fliegl.hu www.fliegl.com

#### Profile:

The Abda plant of the Fliegl Group has manufactured trailers for road and agricultural transport since 1993, as well as other machinery, components and adapters. The site is also the regional centre for Eastern European distribution.

Since its foundation, the business has grown dynamically under the stewardship of Josef Fliegl Jr. Production now takes place on a total floor space of 35,000 m<sup>2</sup>. The production process incorporates all the tools capable of delivering the efficiency and quality desired by our customers (laser technology, welding robots, finishing, etc.). The company is also equipped to handle the demands of the future thanks to a series of investments to expand capacity and improve quality. This was made possible by the government's Széchenyi funding programme.

As a result of a series of successful product and manufacturing innovations, Fliegl-Abda Kft. has developed into a large and respected vehicle manufacturer and Fliegl products are increasingly common on the roads of Europe. In 2008, Fliegl-Abda Kft. employed 234 people and generated turnover of EUR 41 million.
